FIFTY-SIXTH YEAR

1922

GLEN BROTHERS, Inc.

GLENWOOD NURSERY
Rochester, N. Y.

Three Excellent Reasons Why You Should Purchase "Glenwood-Grown" Products

Mr. A. C. WEST,
Atlanta, Ga., Sept. 24th, 1921

1369 Harbort Ave., Memphis, Tenn.

Dear Sir: Since writing you yesterday on peach pits and peach trees, per your request to our Executive Office.*

I wish to suggest to you, that if you think of a home orchard—an orchard such as graced every plantation south in the 40's and 50's, that you write Glen Brothers, Nurserymen, Rochester, N. Y. in reference to a small outfit—a choice outfit—for such orchard. They are reliable. The soil of the Genesee Valley in which they have their great nursery, gives extra rootage to all trees and plants they grow. I am not directly or otherwise an agent for them, but I know what they have done in this State by way of introducing A No. 1 fruit of several kinds. The goods they sell support the price asked.

Yours truly, MARTIN V. CALVIN
(for 17 Consecutive Years Sec. Georgia State Agricultural Society, Marietta, Ga.)

This paragraph added to a letter dated October 31st, 1921, from Mr. J. F. Townsend, 1724 Frick Building, Pittsburgh, Pa.:

"I have decided to place this order with you after getting the catalogues from all nurseries advertised in the Garden Magazine, and I should judge that there were over sixty of them, because I want good stock and you seemed to have more of the kind of trees that I wanted than any others."

(Mr. Townsend's order amounted to \$125.50.)

Extract from letter received November 6th, from Mr. E. S. Martin, New Straitsville, Ohio:

"In these days of meeting nearly everywhere rank carelessness, inefficiency, forgetfulness and some other things even worse, I think it only your just dues for me to add that I have been dealing with you for over 20 or 25 years, and have always found your goods as represented, and your treatment efficient and honorable, and you have gotten me "fixed" so that I always couple these things with you whenever I think or speak of you."

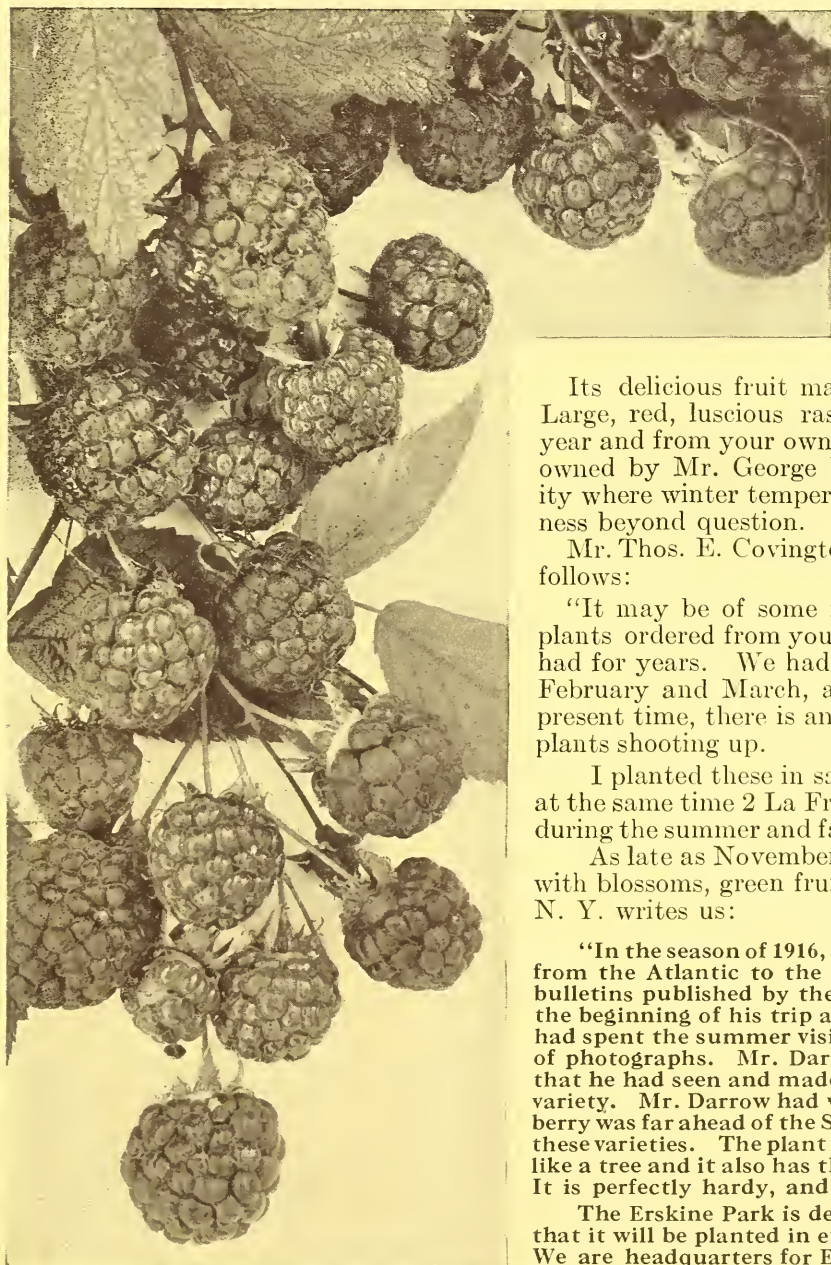

(Mr. Martin's order enclosed with this amounted \$157.00.)

Corner of our Office—Order Department

THIS IS NOT OUR GENERAL CATALOGUE

but merely a special booklet of spring planting specialties of proven merit. If you have not received one of our general catalogues and desire a copy of this handsome 34 page book, which describes with price a complete assortment of fruit, nut and ornamental trees, flowering and foliage shrubs, vines, evergreens, perennial plants, roses, etc., kindly write us at once for Catalogue A56.

ERSKINE PARK EVERBEARING (Brilliant Red) RASPBERRY

*It Bears and Bears—then
Bears Some More*

Its delicious fruit may be picked every day from June until frost. Think of it! Large, red, luscious raspberries on your table every day during four months of the year and from your own garden. Discovered on the beautiful estate, "Erskine Park" owned by Mr. George Westinghouse of Lee, Mass., in the Berkshire Hills, a locality where winter temperature is occasionally forty degrees below zero, proves its hardiness beyond question.

Mr. Thos. E. Covington, St. Paul, Minn., writes us under date of June 2nd, 1921 as follows:

"It may be of some interest to you to know that the Erskine Park Raspberry plants ordered from you in April, 1920, withstood one of the worst winters that we have had for years. We had very little snow and an alternating freezing and thawing February and March, and many of our local shrubs and plants succumbed. At the present time, there is an elegant display of young Erskine Park Everbearing Raspberry plants shooting up.

I planted these in sandy loam, and on the opposite side of a dead furrow, I planted at the same time 2 La France Everbearing Raspberries which showed equal development during the summer and fall, but this spring every one is dead, not a live root to be found."

As late as November 20th, we have cut branches from plants growing in the nursery, with blossoms, green fruit and ripe fruit upon them. Mr. Bert Baker of Hoosick Falls, N. Y. writes us:

"In the season of 1916, Mr. George M. Darrow of the U. S. Dept. of Agriculture, was travelling from the Atlantic to the Pacific, visiting fruit growers to obtain information on berries for bulletins published by the Department of Agriculture. Mr. Darrow was at our place both at the beginning of his trip and at the end, and on his way back he spent the night with us. He had spent the summer visiting the different fruit growers of the country, and taking hundreds of photographs. Mr. Darrow being "full" of berries, talked about all the different varieties that he had seen and made a study of on his trip, advised me by all means to try some of this variety. Mr. Darrow had visited this estate before and was most favorably impressed that this berry was far ahead of the St. Regis and Ranere, and when it became known, that it would replace these varieties. The plant is by far the strongest growing Raspberry I have ever seen. It branches like a tree and it also has the largest and most roots of any variety with which I am acquainted. It is perfectly hardy, and the berries are very large."

The Erskine Park is destined to be the "DESSERT BERRY OF THE NATION". We predict that it will be planted in every garden in America. Order your plants now for spring planting. We are headquarters for Erskine Park Everbearing Raspberry Plants, and offer for shipment this season HEAVY 2 YR. FRUITING PLANTS, ONCE TRANSPLANTED, AT \$3 PER DOZEN, \$20 PER HUNDRED, \$150 PER THOUSAND.

Large, red luscious berries throughout the summer and fall

Plenty of fruit on this tree 2 years after planting

FRUIT TREES

Extra Large—Extra Old

Super-size fruit trees. Grown Expressly to Save You Time
Trees 4 Years old, 7-9 ft. in Height.

FOR EARLIER FRUITING PLANT SUCH TREES THIS SEASON

You are gaining time when you plant these trees—time is money. For those of our customers who desire trees of a larger size than are usually sold by nurserymen, and desire quicker results, we have grown a few thousands of these handsome specimens. These special trees are well branched, well rooted and well balanced. It takes work, time and money to produce them and we have spared neither.

On November 22nd, 1921, one of the officers of this company picked three large luscious Northern Spy Apples from one of these trees in the nursery row. Many others, that will be used for filling orders this season, also produced fruit in the fall of 1921.

Each tree has been grown, cultivated and pruned for a specimen. All of them grade from 7-9 ft. in height, splendidly rooted, handsomely branched. If you want larger fruit trees, something real choice and fancy for quick results, order before our stock is exhausted.

This New Early Yellow Free Stone Peach

ROCHESTER

Frequently Bears First Season Planted

403 Perfect Peaches picked on four year old tree

Lima, Ohio, August 26, 1920.

"On April 10th, 1916, I set out one of your new Rochester Peach Trees. Last year we picked 5 peaches from it, each averaging the size of an average tea cup. THIS YEAR WE HAVE PICKED EXACTLY 403 LARGE PEACHES FROM THIS ONE TREE. Many people have seen this tree and can hardly believe their own eyes. One of its admirers was Postmaster J. E. Sullivan, who wants me to put him in touch with the fellows who have such trees for sale."
(Signed) C. E. STRAWBRIDGE.

Another customer, Mr. C. N. Thomas, 215 W. 40th St., Savannah, Ga., writes as follows:

"February of this year I bought a Rochester Peach tree from you. On July 20th, same year, I picked one of the finest peaches I have ever tasted. The stone was very small and clean. The meat was a light yellow, perfectly ripe all the way through."

It is a proven fact that our new Rochester Peach is the earliest yellow free-stone, producing fruit in this section the middle of August. It is unquestionably one of the earliest peaches ever discovered. For the home grounds or for the orchard, it is a world beater. Try a few in your garden or if you have an orchard, plant an acre. We offer splendid, well developed trees with plenty of root power, \$1 each, \$10 per dozen, \$75 per hundred. Extra large trees, \$1.50 each, \$15 per dozen, \$100 per hundred.

A basket of the most delicious fruit the second year after planting

DWARF FRUIT TREES

Will Often Produce the First Season Planted

Tree planted in April 1919 produced 21 Perfect Apples 1920

Our good customer Mr. Wm. F. Cole, Cecilton, Md., writes us under date of April 12th, 1921, as follows:-

"I am enclosing a snapshot of a dwarf apple tree taken last July, and one of six trees bought from you in April 1919. There were 21 perfect apples on it."

Another good customer, Mr. Gustav Zeese, 424 W. 33rd St., New York City, writes as follows:

"You may be interested to learn that a few of the dwarf apples planted last May bore fruit."

\$6.00—THIS ALL SEASON DWARF FRUIT TREE COLLECTION—\$6.00

1 Red Astrachan Apple,	Season for table use,	August

1 Winesap Apple	" " " "	January to June
1 Koonce Pear	" " " "	July
1 Bartlett Pear	" " " "	September
1 Anjou Pear	" " " "	October, January

Single trees, Apple \$1.25 each. Pears \$1.00 each, or we will send you the six trees as above for \$6.00. Plant trees 10-12 feet apart.

Usually bear the first season planted

THE BLACK WALNUTS

Make that Poor Land on Your Farm Pay

One of the most valuable nut trees grown, its timber being highly prized for furniture, interior furnishings, automobiles, sewing machines, firearms, and the like. The wood is a rich dark brown, very durable, hard, strong and splits easily; takes a fine polish. In addition to its importance as a timber tree, however, the round, rough nuts furnish rich, meaty kernels which sell at high prices. A noted authority on nuts recently made the assertion that "The planting of nut trees along all the public highways would, in less than twenty years, result in a crop the food value of which would be greater than at present produced by the entire livestock industry of the country."

Absolutely hardy, growing and bearing under adverse conditions, the American Black Walnut surpasses all other varieties of nuts in point of hardiness. From Canada to the Gulf of Mexico, the Black Walnut will thrive and after the first few years requires little attention, making a rapid, sturdy growth and soon producing an addition to the owner's income without operating expense.

Plant a grove this spring. If you lack the land, plant them along the fences, ditches and roadsides. Plant, if only a single tree.

Prices: 4-5 ft., \$1 each, \$10 per dozen, \$60 per hundred; 6-8 ft., \$1.50 each, \$15 per dozen, \$100 per hundred; extra large trees, 8-10 ft., \$3 each, \$30 per dozen, \$200 per hundred.

THE BUTTERNUT

One of our finest native nut trees. A grove of these trees rapidly grows into money. The wood is much valued because of the beautiful finish possible in cabinetwork. The large, elongated nuts are rich, sweet, and of delicate flavor; very nutritious. The size of the nuts can be increased by cultivation. As the present supply of cultivated Butternuts is insufficient to satisfy the demand of a single city market, there are large profits in store for planters who will exert themselves to supply this demand. The trees bear when young, and after they come into full bearing will bring large returns on the original investment. Plant largely of Butternuts. For hardiness, disease-resistance, and general all-round desirable characteristics, the Butternut has few superiors. 5-7 ft., \$1.50 each, \$15 per doz. 8-10 ft., \$3 each; \$30 per 12.

HARDY ENGLISH WALNUTS

Do you know that we are growing right here at Rochester, English Walnut trees that produce nuts equal in flavor and appearance to the best Californian nuts? Try a few of our trees in your garden this spring. Not only do the trees produce an abundance of delicious nuts, but the English Walnut makes a very desirable shade tree for the lawn. Here at Rochester, in fact all over Western New York are thrifty, bearing English Walnut trees. We can recommend our hardy, acclimated trees for any locality where winter temperatures are not too severe for peach trees.

For two consecutive years, nuts produced from trees grown in our nurseries took first prize at the Western Washington Fair, Puyallup, Washington.

Glen Brothers, Inc., Rochester, N. Y.
Gentlemen:

Seattle, Wash., Oct. 19, 1921.

I am glad to be able to report that at the Western Washington Fair, held at Puyallup, I again won first prize on my exhibit of English Walnuts, raised on trees purchased from you.

(Signed) David Whitecomb.

Fairport. Grown from nuts from parent trees which came into bearing at four years of age. An excellent variety. 2-3 ft., \$1. each, \$10. per doz., \$75. per 100; 3-4 ft., \$1.50 each, \$15. per doz., \$125. per 100; special **specimen trees**, 5-6 ft., \$5. each, \$50. per doz.

Thomson. Grown from nuts produced by the Thomson orchard. 2-3 ft., \$1. each, \$10. per doz., \$75. per 100; 3-4 ft., \$1.50 each, \$15. per doz., \$125. per 100; special **specimen trees**, 5-6 ft., \$5. each, \$50. per doz.

EXTRA-LARGE ENGLISH WALNUT TREES. Superb for lawns and driveways. For those of our customers who wish to get the earliest possible results, both in bearing, age, and appearance, we offer, this coming Spring a few specimen trees; will prove exceptional values. 6-8 ft., \$10. each, \$100. per doz.

JAPANESE WALNUT TREES

A tree that is of particular interest to northern planters because of its hardiness, withstanding the temperature of 20 to 30 degrees below zero without injury. Comes into bearing at an early age—usually in three or four years. The meats are large, very sweet, easily removed, for the shell is very thin and parts easily at the sutures, enabling one to get the kernel out whole. Extensively used by confectioners, and as a dessert nut has few superiors. We recommend it as one of the best of the Japanese varieties. Owing to our large stock on hand we are able to offer extra fine trees to spring planters at the following prices: 4-5 ft., \$1.25 each, \$12.00 per dozen. 6-7 ft., \$2.00 each, \$20.00 per dozen.

When your hands are idle, plant a tree—a Black Walnut tree

The "Japs" are hardy, and bear when young

Add sugar and cream—such a dish to start the day with

There are blueberries and blueberries, but try our plants for blueberries

Set the plants three feet apart each way

The Perfect Everbearing Strawberry

SUPERB

Strawberries in June, and strawberries in October, strawberries in July, August and September.

Not the ordinary kind, but the extra-ordinary kind, for in Superb we have an everbearing strawberry that commences to fruit in June and continues to fruit throughout the summer, the heaviest crop frequently being picked in October. On a cold fall morning last November, we picked at the nursery, a dish of the most delicious strawberries we ever tasted.

A well known authority on strawberry culture states:- "You simply cannot keep them from fruiting from June until November unless you pick their blossoms. They are the MOST PERSISTENT plants in their fruiting habit that I have ever known."

RECORD—The editor of a well known Western newspaper reports the following. One square rod planted May 1st produced July 23rd, 3 quarts; August, 24 quarts, September 24½ quarts, October, 23 quarts.

Hardy from Maine to California, and from Hudson Bay to the Gulf. Strawberries are easy to grow and they multiply fast. Order some plants and we will tell you how to make the bed and plant them. We will get you started right and last but not least plants set this spring will produce fruit this summer.

Strong field grown plants, packed to carry safely to any part of the United States or Canada, \$1 per dozen, \$5 per hundred, \$40 per 1000.

BLUEBERRIES

The Fruit par-Excellence

Millions of dollars worth of blueberries are sold every year. Practically all of them are gathered from swamps, hillsides and wild pastures, where they grow without human aid. Today it is a comparatively easy matter to provide for your own wants in your own garden. Grown as easily as currants or raspberries, the bushes are never more lovely than just before the berries are ready to pick. The indescribable blue of the ripe berries and the pink of those that are ripening, create a charming contrast. The bushes have no thorns and the berries being firm, there is no soiling of the hands or injury to the most delicate apparel—clean beautiful fruit, supremely delicious. Blueberries with cream, blueberry pie, nothing quite so delicious.

Nor should the ornamental value of the blueberries be overlooked. Prof. Bailey says—

"In the spring the young shoots and leaves are a rich bronzy red, later the clusters of long, white flowers, followed by clusters of dainty pink buds. In winter the red bark creates a charming tracing of red twigs against the snow. Rarely does a plant or shrub combine such exquisite beauty with a fruit than which there is none more delicious. It is one of the most valuable species both for fruit and as an ornamental shrub. It thrives in the garden and is readily susceptible to improvement by cultivation."

Price: Strong bushy plants, 2-3 ft., \$1.75 each; \$18.00 per 12.

BURBANK'S GIANT CRIMSON RHUBARB

Rhubarb—Pie Plant—whatever you wish to call it, there is nothing like it for pie and sauce—it's healthful too—

Plant this spring, ready to use in thirty days

Extra large, of fine bloom, and crimson clear through, this new variety of appetizing "pie-plant" should be in every garden and will be when known. Plant a few this spring along beside that you now have growing in your garden and note the difference. BURBANK GIANT CRIMSON is superior in size and quality to any variety we have ever tasted. It is an early variety, without being in the least tough or stringy, with a mild sub-acid flavor. Largest and best of all for market or home use.

Plant this Spring in good garden soil, manure well, and have delicious pie and sauce all summer.

Price for strong roots, 50c each, \$3.00 per dozen.

LOGANBERRY

A Famous Berry

We remember our first taste of Loganberry. That first taste was worth the price that we are charging you today for one dozen, fine, big fruiting plants.

If you have ever eaten Loganberries you will surely want a few of these plants growing and fruiting in your own garden; if you have never tasted them—well, you have something coming.

A great novelty. Fruit $1\frac{1}{4}$ inches long.

Eight tons of fruit from an acre of ground is not an uncommon yield, while a dozen plants supply the wants of a whole family.

The fruit is larger than the largest size Blackberry; is of the same form and shape; color, when fully ripe, bright red, deepening to maroon. It partakes of the flavor of both the Blackberry and the Raspberry, having a very mild, pleasant, vinous flavor, delightful to the taste, and not found in any other fruits.

It is excellent for the table, to eat raw or stewed, and for jelly or jam is without an equal. The canes are enormous bearers, and the fruit commences to ripen early.

We offer but a few thousand plants. These are strictly of our own growing right here in the vicinity of Rochester, and while the supply lasts we will fill orders at \$6.00 per dozen, \$45 per hundred.

BURBANK'S THORNLESS BLACKBERRY

Something entirely different—Introduced by Luther Burbank

Burbank's Thornless Blackberry is all and more than anyone has claimed for it. We candidly believe that in the near future, the majority of blackberries grown both for home use and for shipping, will be of the thornless sort. The fruit is as easy to gather as grapes, neither gloves nor courage needed. One can gather them readily, getting every berry, and not getting scratched from the vine.

BURBANK'S THORNLESS BLACKBERRY is an immense bearer after the second year. Fruit good size, jet black, finest of flavor. Never before has history recorded a commercially valuable thornless blackberry. They have come to stay and take their place amongst fruits. We offer it again this season and can make prompt shipment throughout the planting season of spring 1922. Strong, well rooted plants: \$3.00 per 6; \$5.00 per 12; \$30.00 per 100.

PEDIGREED WASHINGTON ASPARAGUS

The new rust resisting variety developed by the United States Department of Agriculture

Washington Asparagus is the first result of a blister proof campaign for the eradication of asparagus rust and is as far as possible an extremely resistant, vigorous, and high yielding strain of giant asparagus. The plants represented in Pedigreed of the last three generations are the best found in a ten year search among millions of plants tested.

By best we mean the ones that have produced offspring uniform—rust resistant—high yielding—large size—unbranched shoots—with good top buds of rapid growth which indicates tenderness.

RUST RESISTANCE—HIGH YIELDING—LARGE SIZE—UNBRANCHED SHOOTS

Asparagus is one of the earliest and most wholesome vegetables that can be grown in every home garden. Asparagus freshly cut and promptly served is one of the most delicate, wholesome and appetizing products of the home garden. Its early appearance in the spring together with the fact that an asparagus bed when once established will produce for many years, makes it of special importance in the home as well as in the market garden and on the truck farm.

OPPORTUNITY

We offer all we have for spring 1922, 100,000 well developed roots. Orders will be filled until our stock is exhausted at the following prices:

\$3 per 50, \$5 per 100, \$40 per 1000.

HONEYSWEET

A Delicious Black Raspberry Sweet as Honey

Introduced but a short time ago, Honeysweet won favor from the start. Today it is one of our largest sellers. It is productive, young canes frequently producing clusters of 80 to 100 berries. It is hardy, passing through the severe fruit tree killing winter weather of 1919–1920 without injury to any plant on a four acre patch. Its large size and glossy black color making it a desirable market berry. A real raspberry—a raspberry from root to tip. As a dessert berry, in pies, as a canned sauce, as a jam—it is delicious, and well worth planting.

We offer extra strong, well rooted plants, once transplanted. \$3 per 12, \$20 per 100, \$125 per 1000.

A Raspberry-Blackberry. that's what it is

Introduced by Luther Burbank: 'Nuff Said

It is more economical to grow your own

A Jewel for Your Garden

A Charming Vine Summer and Winter

Hydrangeas—no shrubs more desirable

The Dainty Phlox in a Myriad of Colors

A Rare Rose of Red and Old Gold

JULIET

*Outside of Petals, Old Gold, Interior Rich Rosy Red,
Changing to Deep Rose as the Flowers Expand*

Imagine a rose of old gold and rosy red, the flower large and full, of powerful and delicious fragrance, growth strong, vigorous and upright, blooming both in summer and autumn, and you have Juliet.

Personally we regard it as one of the finest roses yet introduced. At "GLENWOOD" where we make roses a specialty, Juliet attracts as much or more attention than such fine varieties as Los Angeles, Lady Hillington, Mrs. Aaron Ward, and others. We offer strong, 2 year plants of Juliet at **\$2 each, \$20 per 12.**

EVERGREEN BITTERSWEET

*Climbing Euonymus Vegetus—Beautiful 365
Days of the Year*

Particularly adapted to cover garden walls, old stumps or embankments with any exposure, but the fruiting is best when the plants receive the warm sun; the plants are strong, robust climbers and in fall and winter bear a profusion of bright red berries. The vine is covered the whole year with green foliage, and absolutely holds the color even in hottest summer or coldest winter. The plant shown in the illustration is about four ft. high, and has been cut back to the height of the foundation a number of times. The picture was taken in March last year, and at this time the vines showed many clusters of bright red berries that had been carried through the winter.

Price for good strong plants, **75c each; \$7.50 per 12.**

THREE EXQUISITE SHRUBS

- 1 Spirea Anthony Waterer (flower red)
- 1 Hydrangea, arborescens (flower white)
- 1 Butterfly Bush "Attract the butterflies" (flower blue)

Red, white and blue. These three shrubs make an ideal combination planted in groups, or about the foundation of the house. The plants we offer are bushy, well rooted and will bloom the first season planted.

Price for the collection, **\$2.25 (3 plants)**

4 Collections (12 plants) **\$7.00**

Cut Flowers Continuously From May to October

AN OLD FASHIONED FLOWER GARDEN

*24 Choicest Perennial Plants—Extra Heavy
Clumps—\$7.00*

Beautiful for Bed or Border

Number Plants	Varieties	Color Flowers	Blooms	Height
4	Achillea Rosea	pink	June, July, Aug.	15 inches
4	Anchusa Italica	blue	June, July, Aug.	3½ ft.
4	Phlox	asst. colors	July, August	18-24"
4	Chrysanthemums	asst. colors	Sept. Oct.	2 ft.
4	Spanish Iris	purple	May, June	2 ft.
4	Coreopsis lanceolata	yellow	June, July, Aug.	20 inches

The plants offered in this collection are extra strong and large and are grown expressly to bloom this summer. Order at once. **Price only \$7.00 for garden complete.**

EXCELSA DOUBLE FLOWERS

One of America's Finest Climbing Roses

Double flowers, interiors of crimson maroon with the tips of the petals scarlet, produced in large trusses of 30 to 40. Almost every eye in a shoot produces flower clusters. Its foliage is a magnificent glossy green, and is quite immune from insects. It is the finest of all crimson ramblers and its charming crimson clusters will insure this lovely scarlet pillar rose a place in every amateur's garden for it is very hardy in addition to all its other fine points. We offer for spring planting, 2 year blooming plants at \$1 each, \$10 per 12.

LILACS

Supremely Lovely

WE OFFER 12 RUGGED PLANTS FOR \$7.50

Lilacs, the theme of song and story, bring the atmosphere of the "Old Homestead" to your estate.

Over wide areas their delicate scent perfumes the air, and their profuse, graceful blossoms, with gorgeous changing tints, are matchless for floral decorative effect.

All our varieties thrive in any fertile soil and can be used singly, massed or in groups to produce the effect desired.

We are offering this season for special selection twelve vigorous plants assorted colors, early and late flowering. Everyone will want one of these charming collections for planting about the home, which will add beauty and fragrance in the spring as no other flowering shrubs will. PLANT THEM THIS SPRING, they will bloom in a few days. Price only \$7.50 for this dozen.

AGAIN WE OFFER THESE

3 WONDERFUL PAEONIAS FOR \$2.00

They really are wonders. Plant them this spring

EDULIS SUPERBA (pink). Bright mauve pink, large, loose, flat crown; quite fragrant; early. Blooming about Decoration Day. We regard Edulis Superba as one of the finest pink variety in our collection comprising over forty varieties.

FESTIVA MAXIMA (White). The best and most popular white flowered paeonia. Very large, globula, rose type. Pure white center, prominently flecked crimson; outer petals sometimes faint lilac white on first opening. Very tall, strong, vigorous grower. Early.

FELIX CROUSSE (Red). Brilliant red—absolutely nothing finer in red paeonias. Large globular, typical bomb. Fragrant, strong grower, freebloomer. Here is a paeonia you will be proud to possess. Never during our more than half a century's experience as growers of choice paeonias have we offered a collection for \$2 that possessed the merit and charm of this one. Order at once—stock is limited.

BEAUTIFUL CUT LEAF WEEPING BIRCH

12 TO 14 FEET—SPECIAL SIZE—12 TO 14 FEET

We find that we have several thousand extra fine, specimen trees of Cut Leaf Weeping Birch to offer this season. These trees are well rooted, they are symmetrical, branching from near the ground and will average 12 to 14 ft. in height. This variety of birch is a rapid grower and perfectly hardy everywhere. Its bark of silvery white forms a charming contrast with the delicately cut dark green foliage. A desirable tree for either lawn or street planting—for shade or ornament. While our supply lasts, we offer them in this extra size, every tree grading 12 to 14 ft. and handsomely branched:

\$5 each, \$50 per 12, six at the dozen rate.

Climbing roses now have a place in every garden

Delicately perfumed flowers in May

They rival the rose in beauty and fragrance

Tall, slender, graceful, a homeful tree for the home

Big Juicy IVES Grapes for Delicious Grape Juice

Nothing Quite so Sure to Grow, Nothing Quite so Sure to Bear, Nothing Quite so Sure to Please Every Taste

EXTRA-HEAVY 4 YEAR OLD VINES—BIG FELLOWS—SPECIAL

Plant a
Grape vine
whenever
you can find
a space
six inches
square.

We receive many letters each season from customers who desire to plant an extra good grape and who want to buy plants of a **larger size** than those usually offered. To supply the demand we have selected the **IVES** as the best black grape we know of and offer this Spring a limited quantity of **extra size plants** 4 years old. These plants will naturally produce fruit quicker and to those of our customers who want something real choice and fancy, we recommend these plants.

IVES was originated by Henry Ives of Cincinnati, Ohio, probably from the seed of Hartford. Its color is black; BUNCH extremely large, shouldered, compact, handsome; BERRY, large, tender, juicy, sprightly vinous, rich, sweet without pulp. VINE is vigorous, healthy, hardy. In addition to all this, it is a very reliable variety and usually free from mildew or rot.

If you want a delicious Grape, plant Ives. If you want quick results, PLANT THESE EXTRA SIZE VINES.

PRICE—\$2.00 each; three for \$5.00; six for \$9.00; twelve for \$15.00.

Old Glory Grape Set

Red, White, Blue—These 3 for \$1.50—2 Year Old Plants.

Any posted man will confirm our statement that these three are unrivalled. They combine STRONG, QUICK GROWTH, HARDINESS, PRODUCTIVENESS AND QUALITY, and the price is so low that all can afford to have them. They require but little room—"any old fence will do"—and but little care, and BEAR YOUNG.

Delicious fruit the 2nd or 3rd year after planting. CHOICEST AND BEST VARIETIES.

CATAWBA (Red)—Bunch medium, somewhat loose; berry medium to large, round; a rich shade of red; very handsome and attractive; flesh tender, sweet, and with a rich aromatic flavor; ripens soon after the Delaware, vigorous and productive. We regard it as one of the best red grapes.

NIAGARA (White)—Bunch medium to large, compact, occasionally shouldered; berry large, roundish, uniform; skin thin but tough, pale green, changing to pale yellow, with a thin whitish bloom; flesh slightly pulpy, tender, sweet. Remarkably vigorous, healthy and productive; foliage thick and leathery. Ripens with the Concord. All things considered, probably the most valuable white grape in cultivation.

CONCORD (Blue)—Clusters large and handsome; berries, large, nearly round with handsome blue bloom. Flesh rather firm, but tender; quality rich, sweet, slightly vinous; a strong and vigorous grower with healthy foliage. The berries do not drop early from the cluster and the fruit keeps a long time in perfection.

GLEN BROS., Inc., Glenwood Nursery

Established 1866

ROCHESTER, N. Y.

"Where the good trees come from"
